

Peter's Pocket

\$45.00

Peter's Pocket,Â Last winter a buddy, Pete, from Canada called and asked if I could make a pocket quiver with a "real" pocket that was usable. So I designed this quiver. It has a nice size pocket for all things a traditional shooter might need. Made from veg tanned leather for durability in foul weather. It will hold up to 8 wood arrows quite nicely. No need to use belt loops to hold it steady, just slip it in a back pocket and go. Comes in saddle tan or dark brown, pocket flap closes with a Sam Brown button, arrow head embossing on flap can be replaced with your initials at no charge.

If you are looking for something like the Bear carving then please contact me.

All fields below are required, if you don't want your initials on it then enter **NONE** in the Initials Here field.
